CORIAN

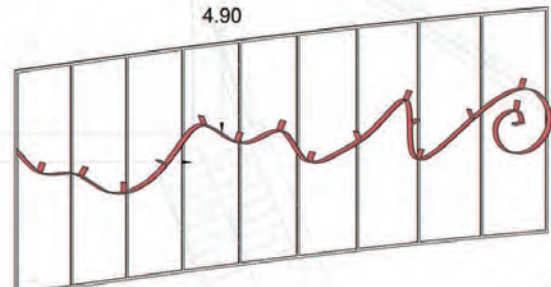

The importance of Corian is that revolutionized the industry in the production of kitchen countertops and vanity tops, representing the first product with the same qualities of the stone floors without the typical defects of the plans chipboard or synthetic or semi-synthetic and the advantage of the possibility to be produced in any shape and be machined on a lathe such as wood. It is a composite material formed by 2/3 of aluminum hydroxide and 1/3 acrylic resin with eventual addition of color pigments.

KARTELL LIBRARY
BOOKWORM

Bookworm by Kartell is flexible and durable. The flexibility is given by using extrusion processing technology that ensures the load resistance, the greater if the library is attached with a curved shape. And 'possible to configure the library Bookworm depending on the form and shape you want.
Material: Polyvinyl chloride (PVC) opal wine red.

Length: 820 cm
Depth: 20 cm
Height: 19 cm
