PROJECT - FAN MUSEUM\_

The name of the museum derives from the desire to create a building that opens like a fan to the most in need of development and, in our opinion, even if it's the most economically poor, it is the richest in terms of human capital. In fact the fan museum is, above all, designed for local youth, so they can learn arts and crafts, and reinvigorate the craft market again. We thought of a fan that opens to new encounters, relationship, know hows and culture, and new ways of producing wealth\_
